

Capability Statement

Concreting + Steel Fixing + Formwork

About Us

JBuild Industries is a professional civil construction company, specialising in formwork, steel fixing, and concrete services across NSW.

Our comprehensive range of services spans the entire lifecycle of a construction project, from initial excavation through to completion. Our portfolio showcases a variety of structures, including bridges, pump stations, retaining walls, and complex utility infrastructures, alongside essential civil construction components like headwalls, pits, culverts, buildings, precast units, and more.

Leveraging years of industry experience, we are deeply committed to delivering work of the highest quality, prioritising safety above all. Our approach combines the use of cutting-edge technology and practices to ensure each project is executed with precision, efficiency, and adherence to timelines. We understand the unique needs of our clients, offering solutions that are not only high in quality but also customised to meet specific requirements, budget constraints, and project schedules.

At JBuild Industries, our team is comprised of highly qualified professionals, each bringing an innovative perspective to civil construction. We are dedicated to excellence, striving to provide the best services possible. Our commitment to a smooth, seamless process from inception to completion has earned us the trust and partnership of many of the region's top contractors, architects, and engineering firms.

As **specialists in all things concrete**, JBuild Industries is more than just a construction company; we are a reliable partner in bringing complex civil projects to life, ensuring each project stands as a testament to our dedication to quality, innovation, and client satisfaction.

Services

Specialists in all things concrete.

Concreting + Steel Fixing + Formwork

civil construction

Sewerage & Pump Stations

With decades of expertise and cutting-edge techniques in concrete construction to deliver top-quality, cost-effective water and sewage pump station projects on time and within budget.

civil construction

Cast in-situ & Pre-cast Concrete Walls

With a vast experience in the construction and installation of concrete walls, JBuild Industries is a leading provider of customised precast and insitu solutions. Whether it is tilt panels or cast in-situ walls, our team of highly trained specialists have the knowledge and expertise to deliver the highest quality product and service for any type of project, no matter the scale.

civil construction

Driveways, Footpaths & Pavements

Our team of experienced tradesmen specialise in the construction of concrete slabs, driveways, footpaths, and pavements for any commercial project. We are committed to providing efficient solutions for your project needs while utilising high-quality materials and the newest construction technologies. Our structures are designed to last through all weather conditions so you can depend on their long-term durability.

civil construction

Other Structural Concrete Works

We offer comprehensive concrete placement services to assist our client with a wide range of commercial and industrial works. From stairs, retaining walls, block walls, pits, manholes, etc. we undertake all types of civil and construction works to provide a fully integrated solution to our clients, in turn, reducing costs and increasing efficiency to their projects.

civil construction

Suspended Slabs FRP

We provide full poured in place suspended slabs, as well as hybrid systems that use a combination of precast beams to support the slab. We use high quality materials and adhere to industry best practices to ensure every job meets the highest quality standards. Our suspended slabs are designed to last and provide the ideal foundation for any commercial or industrial building.

civil construction

Concrete Culverts & Head Walls

Our team provides full-service services, including custom engineering, design, material procurement, and installation of culverts ranging from small standard spans to customized beams of any size and shape. We are experts in all aspects of culvert and headwall installation including: slope grading, base preparation, framing, form work, concrete placing, hand excavation, and rebar installation.

civil construction

Treatment Plants

We are experts in the construction of concrete wastewater treatment plants. We use a variety of technologies to construct custom systems that are tailored to the most stringent environmental requirements. We can assist from design, construction, and engineering of a full-scale treatment plant, to system optimization and integration.

civil construction

Bridges & Causeways

We have extensive experience in the construction of concrete bridges and causeways, having completed multiple projects across NSW. This includes constructing reinforced concrete bridges with precast and/or cast in place construction techniques, as well as precast simply supported or pretensioned and post-tensioned beams, cantilevers, and box girders, ground preparation to installation of pile anchors and formwork.

concrete remediation

Concrete Remediation

Our remedial division specialises in a wide range of concrete remedial solutions. We repair, restore, strengthen and protect concrete structures. From concrete cancer, chemical or environmental erosion to mechanical or water damage and much more, our highly skilled team have extensive industry experience on high profile projects involving complex concrete applications.

Experience

Previous Projects

- **GWANDALAN SUB-DIVISION**
2 x precast pump station, valve pits, hard stands and concrete access pavement road.
- **KURRI KURRI RECYCLING PLANT**
980lm x 6m high cast in-situ reinforced walls, 11,000m² yard slabs FRP.
- **BRISBANE RECYCLE CENTRE**
6m high structural walls storage bays
- **NEWCASTLE RAAF BASE**
Three storey external fire exit concrete stairs
- **NEWCASTLE KING STREET CARPARK**
High voltage protection culvert, temporary hoarding for eight storey car park ready for demolition.
- **MOREE SPILLWAY**
Culverts, headwalls and concrete spillways
- **GOSFORD SEWERAGE PUMP STATION**
4m diameter cast in-situ pump station, valve pits, collecting manhole and concrete roadworks.
- **MORISSET SEWERAGE PUMP STATION**
5.6m diameter cast in-situ pump station, valve pits, collecting manhole and concrete roadworks
- **DORA CREEK - SEWERAGE PUMP STATION**
3.6 diameter X 9m deep cast in-situ pump station, valve pits, collecting manhole and concrete roadworks
- **KURRI KURRI ALUMINIUM PLANT**
Demolition of existing slab, construction of casting pit and Furness pits
- **SPRING RIDGE HEADWALLS**
6 cell set of headwalls
- **KEMPSEY CREEK BRIDGE**
Removal of timber bridge and installation of precast concrete replacement
- **PORSCHE NEWCASTLE**
1100m² showroom floor slab
- **NEWCASTLE TRAM LINE**
Facade protection wall & planter boxes

JBuild Industries has highly experienced and dependable concreters can meet your concrete needs no matter how big or small. With many years of collective experience, our team is fully trained and will deliver superb results every time. We pride ourselves on offering a friendly and reliable concreting service, and strive to exceed expectations. So, whatever the size of works, you can be sure that our team of expert tradesmen will turn up on time & deliver the high quality results you deserve.

Core Values

Safety

Jbuild Industries is committed to providing a safe environment for employees, customers, contractors and suppliers. All safety standards are adhered to in accordance with NSW ISO45001 standards for Occupational Health and Safety. For assurance of safety, rigorous safety checks are carried out on contractors and suppliers and Jbuild Industries imposes strict safety measures on all construction projects.

Knowledge

At JBuild Industries, we believe in providing our clients with the best possible building solutions and products. We are committed to staying up-to-date with the latest building technologies and industry standards, so that our clients can benefit from the most advanced solutions. Our team of highly trained experts is dedicated to providing exceptional customer service and meeting the needs of our clients with careful consultation, planning, and construction. We also provide our personnel with the skills and knowledge necessary to operate our equipment safely. Our employees are trained on the use of the specific equipment they are assigned to operate and are also trained in the areas of safe working practices and behaviors. Regular retraining is necessary to ensure that our personnel maintain their safety knowledge and skills, and to remain current on our safety policies and procedures. We take pride in our commitment to build structures that are safe, attractive, durable, energy efficient, and cost effective.

Environment

Jbuild Industries is also committed to environmental sustainability. The company is certified under the ISO14001 standards for environmental management and works to minimise the environmental impacts associated with its operations. Jbuild Industries is also committed to sourcing construction materials from sustainable sources and ensuring that any waste produced is responsibly recycled or disposed. The company regularly reviews its construction materials and procurement policies to reduce environmental impact and minimise the use of unnecessary non-sustainable materials.

Quality

At JBuild Industries, we are committed to serving our clients needs by providing highest quality services available. Our goal is to ensure that our work meet or exceed customer expectations in terms of reliability, functionality, value and service. To achieve this goal, we employ a quality management system that is based on ISO 9001 standards and guidelines. This system includes the identification and evaluation of customer requirements, rigorous inspection and testing throughout the project life cycle, and continuous improvement to enhance customer satisfaction. We strive for excellence in all of our operations and embrace a culture of continual improvement.

We are committed to continual improvement in everything we do in order to become the industry leader and exceed customer expectations. Our teams strive to make sure our services are of the highest quality and industry-leading. We believe that by investing in quality, we secure our customer relationships and achieve business objectives. We value and strive for excellence throughout all our projects
